Zero to Thrive TRN follow up thoughts from meeting, 1/17/20

Goal	Ideas	Action steps
Finish concept paper 1 (part of defining Network but first pass)	- Break out into different papers (special issue) addressing needs of each sector - Treat concept paper as chance to introduce Z2T-TRN model (what is scope) - If have breakout short implications papers focused on the needs for each sector, could serve as basis for creating other translational materials (infographics, ppt presentations, more fancy…) -	- Authorship guidelines - Feedback from members - Identify journal(s) etc - Think we need to get AN initial paper out and there are others
Define Translational Network (identity, goals, impact) "cross sector connections address the silos and make our work relevant" Needs to start early (training – "advocacy is part of the job" -> IPE activities)	- Positioning statement - Possibly 3 focus areas/cores: research, training, outreach - Build shared identity - Repository of expertise (identify members) - Scope and phased timeline - Define what is "translational"? (many things: implications of basic science; activities to promote cross-sector connections; training)	- Process similar to what we did for Z2T overall - Positioning statement should start from Z2T statement - Branding w Translational Network (email sig), tagline - Ultimately write joint opeds etc. geared to different audiences
Identify Translational Network activities	- Speaker bureau - Have experts "at the	- Create list of what activities 'count' for

	ready" for outward facing translation (e.g., opeds, npr, policymakers, etc) - Create process, format for the above - Cross-sector toolkit – addressing SDOH in clinical care, other venues - Specific translational projects (research, engagement, creating products?) - Sharing the science in an accessible manner - Training (course review, cross-list courses) - Pursue IPE opportunities -	the TRN (share on website?) - AM examples - Internships
Connection and Coordination of TRN	- Identify and feed / connect TRN (academic?) members to relevant opportunities (research, community engagement) - Repository/tracking of Z2T-TRN member activities (faculty survey) - Z2T-TRN membership - Check ins, meetings etc -	- Ideas for new members: - JBKay – pediatric advocacy clinic in law school (who) - Religious studies? - Sociology? -
