01/2015-present Perinatal Consultant to Primary Care across the State of Michigan, University of Michigan, Department of Psychiatry, Ann Arbor, MI

Clinical Interests

- My clinical work focuses on the screening, diagnosis, and treatment of perinatal mood and anxiety disorders, particularly among women exposed to trauma and socioeconomic stress, both in the setting of ambulatory psychiatry and primary care such as safety clinics serving low-income populations. I am the Medical Director of the university-based Women and Infants Mental Health Clinic, and also lead the University's Perinatal Collaborative Care efforts to the community. I am the Medical Director of the Perinatal Psychiatry Access Program (MC3 Perinatal) to Primary Care across the state of Michigan.

Research Interests

- The study of Women's Mental Health Disorders (Depression, Anxiety, PTSD, Bipolar) in pregnancy and postpartum and their impact on offspring development. My research focuses on the study of stress, trauma and mental illness during peripartum, and its influence on maternal wellbeing, caregiving quality, and children's social and biological developmental outcomes.

- The study of women with interpersonal violence exposure (e.g., childhood maltreatment, adult IPV) across the lifetime and their adaptation to motherhood. In particular, I study mothers' cognitive attributions and interactions with their children as consequence of abuse history and mental illness.
- Development and implementation of effective interventions to high risk mothers (and fathers) to promote positive parenting and parent wellbeing. I have co-developed, trial tested and implemented manualized attachment-based and trauma-informed interventions for families with young children (i.e., Strong Roots Curriculum), and am implementing its derivations (mothers - Mom Power; fathers-Fraternity of Fathers; foster care families-Strong Beginnings ; military families-STRoNG; Early Head Start- Hearts & Minds on Babies) in the community.
- Development and testing technology-based screening and treatment delivery (care coordination/telehealth /telepsychiatry) to women at risk (trauma, mental health, substance use) in antenatal and home-based settings.
